KASA JURNALI

Terms of Use, Privacy and Third-Party Notices

Version 2.0 · Effective date: 3 November 2026 · If the Turkish and English texts differ, the Turkish text prevails.

Contents

1. Terms of Use and End-User Licence Agreement
2. Privacy and Personal Data Notice
3. Third-Party Notices

Kasa Jurnali — Terms of Use and End-User Licence Agreement

Version 2.0 · Effective date: 3 November 2026

Important: Please read this Agreement carefully. It contains provisions stating that the Software is provided “as is”, that paid versions or a subscription may be introduced in future for the Software, which is currently free of charge, that the Developer’s liability is limited to the extent permitted by law, that the Software does not replace official accounting records or professional advice, that third-party services such as the optional Google Drive sync are subject to their own terms, and that you are responsible for the accuracy of your records, backups and reports (in particular Articles 4, 7, 9, 10, 11 and 12). If you do not accept this Agreement, do not use the Software and remove it from your computer and devices.

Article 1 – Parties and definitions

1.1. These Terms of Use and End-User Licence Agreement (the “Agreement”) are made between the developer and rights holder of the software called “Kasa Jurnali” (the “Developer”) and the natural or legal person who installs, runs or in any way uses the Software (the “User”).

1.2. “Software” means the Kasa Jurnali Windows program, the web application that runs in the browser on an iPhone or similar device and can be added to its Home Screen (the “iPhone app”), the installer, updates and later versions, the user guide, the report and spreadsheet templates, the icons and graphics, and all documents supplied with them.

1.3. “User Data” means the records, settings, receipt photos, backups, PDF reports, Excel files, the copies sent to the User’s Google account for synchronisation, and any other content that the User enters into the Software or creates with it.

1.4. “Third-Party Services” means services the Software works with that do not belong to the Developer, in particular the Google account and Google Drive services of Google LLC, the GitHub Pages service of GitHub, Inc. on which the Software and its updates are published, the iOS operating system and Safari browser of Apple Inc., and the Windows operating system of Microsoft Corporation.

1.5. A User who uses the Software on behalf of a company, a vessel operation, a yacht owner, an employer or another person declares that he or she is authorised to accept this Agreement on that person’s behalf. In that case “User” also includes the person represented.

Article 2 – Formation of the Agreement and acceptance

2.1. The Agreement is formed when the box “I have read and accept the Terms of Use and Licence Agreement”, shown when the Software is started for the first time on each device, is ticked and the “I accept, continue” button is pressed. The User declares that before accepting, he or she had access to the full text, had the opportunity to read and understand it, and accepts its provisions of his or her own free will.

2.2. The text of the Agreement can be viewed and printed at any time under “Settings & backup › About & legal” in the Software, from the PDF document in the installation folder of the Windows program and from the PDF document at the Software’s web address (kasajurnali.github.io).

2.3. The date and time of acceptance and the version and language of the Agreement are kept only in the records of the device on which it was accepted; they are not sent to the Developer and are not transferred to other devices by synchronisation.

2.4. A person who does not accept the Agreement may not use the Software and must remove it from his or her computer and devices.

2.5. The User declares that he or she is at least 18 years old and has full legal capacity.

Article 3 – Licence

3.1. Provided that this Agreement is complied with, the Developer grants the User a non-exclusive, non-transferable, non-sublicensable and revocable right to install the Software on his or her own computers and devices and to use it to keep his or her own personal or professional cash records.

3.2. On the date this version of the Agreement takes effect, the Software is offered free of charge. Free use does not constitute a commitment or an acquired right that the Software or its functions will remain free of charge in future; the provisions on paid use are set out in Article 4.

3.3. The Software must be obtained only from the Developer’s website (kasajurnali.github.io) or through channels authorised by the Developer. The User may share this address with others, but may not copy, distribute or publish elsewhere the installer or copies of the Software without the Developer’s written permission. Copying the installer only to install it on the User’s own computers is outside this restriction. Every person who obtains the Software may use it only after accepting this Agreement himself or herself.

3.4. This Agreement does not transfer any ownership or intellectual property right in the Software to the User. All rights not expressly granted are reserved by the Developer.

Article 4 – Paid versions and subscriptions

4.1. The Developer reserves the right to offer the whole Software or some of its functions (for example synchronisation between devices, the iPhone app or functions added later) for a fee in future, for example for a one-off price or as a monthly or yearly subscription.

4.2. If paid use is introduced, the conditions on the price, payment method, subscription period, renewal, cancellation and the right of withdrawal are notified to the User in the Software or at the Software’s web address at least 30 (thirty) days before paid use begins, and are presented separately for the User’s approval before purchase, together with the pre-contractual information required by the applicable legislation (in particular Turkish Consumer Protection Law No. 6502 and the Regulation on Distance Contracts).

4.3. No fee is charged to the User unless he or she expressly accepts the paid conditions and makes the payment; no fee is charged retroactively for the period in which the Software was used free of charge.

4.4. A User who does not accept the paid conditions may be unable to use the functions that become paid. Even then, the User Data continues to belong to the User, who can take it out with the Software’s export and backup functions (Excel spreadsheet, PDF report, backup file). User Data remains on the User’s devices and, where synchronisation was used, in the User’s Google account.

4.5. For paid versions, the consumer’s statutory rights that cannot be excluded by contract remain unaffected.

Article 5 – Restrictions

Except where the law expressly allows it (in particular Article 38 of Turkish Law No. 5846 on Intellectual and Artistic Works), the User may not:

a. sell, rent out or distribute the Software for a fee, or provide access to the Software for a fee;

b. decompile, reverse engineer, modify, adapt or combine the Software with other software, or create derivative works from it;

c. use the program identifier or key the Software uses to access Google outside the Software, or use the Software in a way that breaches the terms of Google, GitHub or any other service;

d. remove, hide or alter any copyright, trademark, licence or ownership notices in the Software;

e. use the Software for tax evasion, for issuing false or misleading documents, for money laundering, for fraud, for misleading third parties or for any other unlawful purpose;

f. present the Software or reports produced with it in a way that suggests that the Developer has approved or audited them or guarantees their accuracy.

Article 6 – Intellectual property

6.1. The Software is a work protected under Turkish Law No. 5846 on Intellectual and Artistic Works. All economic and moral rights in the Software and the rights in the name “Kasa Jurnali”, its icon and its visual design belong to the Developer. The fact that the browser downloads the files of the iPhone app and keeps them on the device gives the User no rights in those files other than those granted in Article 3.

6.2. Third-party components included in the Software are subject to their own licence terms; the related notices are set out in the “Third-Party Notices”.

6.3. The rights in the User Data belong to the User or to the respective rights holders. The Developer claims no rights in this data and does not access it.

Article 7 – Nature of the Software; no replacement for official records or professional advice

7.1. The Software is a record-keeping tool that helps the User keep track of daily expenses and cash movements on his or her own computer and devices.

7.2. The Software does not replace the statutory books that must be kept under Turkish Tax Procedure Law No. 213, Turkish Commercial Code No. 6102 or any other legislation, nor e-Ledger, e-Invoice, e-Archive or similar official systems, cash registers or accounting software. Using the Software does not mean that obligations under such legislation have been met.

7.3. The PDF reports, Excel spreadsheets, summaries and calculations produced by the Software are based on the information entered by the User and are for information only; they are not official documents, financial statements, accounting records or audit reports.

7.4. The Software does not provide financial advisory, accounting, tax, legal, investment or any other professional advice. The User should consult a qualified professional before making financial or legal decisions.

7.5. Automatic functions such as category suggestions, importing from Excel, reading litres from descriptions, carrying balances forward and synchronisation between devices rely on the information entered by the User and on predefined rules, and may give wrong or incomplete results. Exchange rates are entered by the User; the Developer does not supply exchange rates and does not check the rates entered.

Article 8 – The User’s obligations

The User is responsible for:

a. the accuracy, completeness and lawfulness of the information entered into the Software;

b. checking the amounts, balances brought forward, totals and reports shown by the Software against the original documents before using, signing or handing them to third parties;

c. keeping the original receipts, invoices and documents for the period required by the applicable legislation (attaching a photo to the Software does not remove the duty to keep the original; see for example Article 253 of Turkish Tax Procedure Law No. 213 and Article 82 of Turkish Commercial Code No. 6102);

d. regularly backing up the User Data (for example to a USB stick or external disk, as a backup file or with Google Drive sync);

e. the security of the computer, the phone and the user accounts on them on which the Software is used (password or screen lock, up-to-date operating system, virus protection and, where needed, disk encryption);

f. where Google Drive sync is used, the security of the Google account (strong password, 2-Step Verification) and preventing other people from accessing it;

g. where personal data of third parties is entered into the Software, complying with Turkish Personal Data Protection Law No. 6698 ("KVKK") and any other applicable legislation, including the obligations concerning the transfer of the data to Google's servers and abroad where synchronisation is on;

h. using the output of the Software correctly and honestly in dealings with the employer, the yacht owner or anyone else to whom the User is accountable.

Article 9 – User Data, backups and data loss

9.1. User Data is kept on the device on which the Software is used: in the Windows program by default in the "Documents\Kasa Jurnali" folder, and in the iPhone app in the app's own storage on the phone. Unless Google Drive sync is turned on, User Data is not sent over the internet. The Developer has no access to this data, no copy of it and no way of recovering it.

9.2. The daily backups the Software makes automatically, the "Back up now" and "Save a backup file" functions and Google Drive sync are a convenience, not a guarantee against data loss. Hardware failure, loss or theft of a device, accidental deletion, full storage, power cuts, malware (including ransomware), operating system or browser errors, cloud synchronisation conflicts, loss of access to the Google account or interference by third parties may cause the records and the backups to be lost or damaged together.

9.3. The records of the iPhone app are also deleted from the phone when the app is deleted from the Home Screen, when Safari's website data is cleared or when the operating system deletes this data under its own rules. Keeping Google Drive sync on or regularly saving a backup file to protect these records is the User's responsibility.

9.4. Uninstalling the Windows program does not delete User Data. User Data is deleted permanently only by the User's own action.

Article 10 – Google Drive sync and other third-party services

10.1. Google Drive sync is optional and works only when the User connects his or her own Google account. While synchronisation is on, the records, settings and receipt photos are sent to a hidden app folder in the User's Google Drive that only the Software can access, and are transferred between the devices connected to the same account. The details are explained in the Privacy and Personal Data Notice.

10.2. The Google account is connected on Google's own sign-in page; the User's Google password is not entered into the Software and does not reach the Developer. The access key issued by Google is kept only on the device on which the connection was made. The User can remove the connection at any time with the "Disconnect" button in the Software or in the security settings of the Google account.

10.3. If the same record is changed on more than one device without each device knowing of the other change, the most recent change applies after synchronisation and the earlier change may be lost. A record deleted on one device is also deleted from the other devices by synchronisation. Incorrect device clocks may affect this order. The User agrees to check the records after important changes.

10.4. Third-Party Services are subject to the terms of use and privacy policies of the companies concerned; the User uses these services with his or her own account and by accepting those terms. The Developer neither owns nor operates these services and does not guarantee that they will work without interruption, will not change, will remain free of charge or will continue to allow the Software access. The Developer cannot be

held responsible for the consequences of interruptions, changes, quotas, account closures or data loss in these services.

10.5. Synchronisation, the update check and loading the iPhone app need an internet connection; any data charges are borne by the User. The basic record-keeping functions of the Software also work without internet.

Article 11 – No warranty

11.1. The Software is provided "AS IS" and "AS AVAILABLE". To the maximum extent permitted by applicable law, the Developer gives no express or implied warranty that the Software will work without errors, without interruption or securely, that it will work on every computer or phone or with every version of Windows, iOS, Google Chrome, Microsoft Edge or Safari, that synchronisation will be complete in every case, that its calculations will be correct in every case, that it is fit for a particular purpose or that it will meet the User's expectations.

11.2. The Windows program depends on Google Chrome or Microsoft Edge being installed on the computer, and the iPhone app depends on iOS and Safari. Updating, changing or removing this software or the Third-Party Services may affect some functions of the Software.

Article 12 – Limitation of liability

12.1. To the maximum extent permitted by applicable law, the Developer is not liable for any direct or indirect loss arising from or connected with the use of, or the inability to use, the Software, including in particular loss of profit or income, loss or corruption of data, records being changed or deleted as a result of synchronisation, business interruption, loss of reputation, tax losses, tax penalties, late-payment interest or administrative fines, claims by third parties, and decisions taken on the basis of wrong or incomplete records.

12.2. The Developer's total liability, on whatever legal basis, is limited to the amount the User has actually paid to the Developer for the Software in the twelve months before the event giving rise to the loss. For losses arising in a period in which the Software was used free of charge, the Developer has no liability, except in the cases listed in Article 12.3.

12.3. This Article and Article 11 do not cover the Developer's liability for intent or gross negligence (Article 115 of Turkish Code of Obligations No. 6098), for defects fraudulently concealed, for injury to life, body or health, or any other liability that cannot be limited or excluded in advance under mandatory rules of law. The User's statutory rights as a consumer that cannot be excluded by contract remain unaffected.

Article 13 – User's responsibility and indemnity

The User agrees to cover, in proportion to his or her own fault, any claims made against the Developer by third parties or public authorities because the User used the Software in breach of this Agreement or of the law, entered unlawful content into it or processed or transferred personal data of third parties unlawfully, together with the reasonable costs the Developer incurs because of such claims (including reasonable legal fees).

Article 14 – Updates, support and changes

14.1. The Developer is under no obligation to provide updates, bug fixes, maintenance or technical support for the Software.

14.2. Unless the User turns this setting off, the Windows program downloads a small version information file from the Developer's website (kasajurnali.github.io) to find out whether a new version exists. A new version is downloaded only when the User presses the "Update" button; the downloaded file is checked against the fingerprint (SHA-256) in the version information file and is not installed if they do not match. Updating does not change the User Data.

14.3. As the iPhone app is a web application, it checks the Developer's website for a new version when it is opened, downloads the new version by itself and starts using it the next time it is opened or when the User

presses “Update now”. Updating does not change the records on the phone.

14.4. New versions the Developer may publish may be subject to amended terms. Amended terms are presented to the User for approval when the new version is started for the first time on each device; the User cannot use the new version without approving them. The terms the User has accepted cannot be changed unilaterally without the User’s approval.

Article 15 – Term and termination

15.1. The Agreement takes effect on acceptance and has no fixed term.

15.2. The User may end the Agreement at any time by removing the Software from his or her computer and devices. If the User breaches this Agreement, the licence ends automatically without the need for notice.

15.3. The Developer may end the free provision of the Software, or the provision of the Software altogether, by giving at least 30 (thirty) days’ notice in the Software or at the Software’s web address; in that case, too, the possibility of taking out the User Data is preserved as set out in Article 4.4.

15.4. On termination the User stops using the Software and removes its copies; User Data remains on the User’s computer and, where synchronisation was used, in the Google account until the User deletes it. Articles 4.4, 6, 7, 9, 10, 11, 12, 13, 16 and 17 survive termination.

Article 16 – Governing law and disputes

16.1. This Agreement is governed by the laws of the Republic of Türkiye.

16.2. Subject to mandatory rules on jurisdiction and to the User’s right as a consumer to apply to consumer arbitration committees and consumer courts, the courts and enforcement offices of the Republic of Türkiye have jurisdiction over disputes arising from this Agreement. Mandatory consumer protection rules of the law of the User’s place of residence that cannot be excluded by contract remain unaffected.

Article 17 – Miscellaneous

17.1. **Severability:** If any provision of this Agreement is held invalid or unenforceable, the validity of the other provisions is not affected; the provision concerned is applied to the extent permitted by law and in the way closest to its purpose.

17.2. **Entire agreement:** This Agreement, together with the Privacy and Personal Data Notice and the Third-Party Notices, constitutes the entire agreement between the parties concerning the Software.

17.3. **No waiver:** If the Developer does not exercise a right, or exercises it late, this does not mean that the Developer has waived that right.

17.4. **Assignment:** The User may not assign his or her rights and obligations under this Agreement without the Developer’s written consent. Where the Software’s web address is shared with someone else under Article 3.3, the person who will use the Software accepts this Agreement separately.

17.5. **Language:** This Agreement is made in Turkish and English. If the two texts differ, the Turkish text prevails.

Article 18 – Contact

You can send questions and notices about the Software to the Developer through the channel from which you obtained the Software.

Kasa Jurnali — Privacy and Personal Data Notice

Version 2.0 · Effective date: 3 November 2026

In short: Kasa Jurnali keeps your records on your own device. Unless you turn on Google Drive sync, none of your records is sent over the internet. If you turn sync on, your records and receipt photos are sent only to your own Google account; the Developer cannot access them. With a setting you can turn off, the Windows program checks the Developer's website for new versions; your records are not sent when it does. There is no advertising, tracking or usage statistics.

1. Purpose and nature of this notice

1.1. This notice explains openly, for the Windows program and the iPhone app of Kasa Jurnali (the "Software"), where and how information is kept and when it is sent over the internet.

1.2. The Developer does not see, receive, store or process the data entered into the Software or the copies synchronised to Google Drive; the keys to your Google account also stay only on your devices. The Developer is therefore neither a data controller nor a data processor of that data within the meaning of Article 3 of Turkish Personal Data Protection Law No. 6698 ("KVKK"), and does not ask you for explicit consent.

1.3. This text is a notice, not an explicit consent form. The "I have read and understood" box you tick at first start only confirms that you have read and understood it. Taking into account Principle Decision No. 2026/347 of 18 February 2026 of the Turkish Personal Data Protection Board, this confirmation is kept separate from the acceptance of the Terms of Use.

2. What the Software keeps, and where

2.1. In both versions the following information is kept on your device:

a. **Cash records:** date, company or person name, description, amount, currency and exchange rate, payment method, category, litres, notes and the time each record was last changed; for synchronisation, the identifiers of deleted records and the time they were deleted;

b. **Settings:** the book name, the names of the persons who prepare and approve reports, the opening cash, the warning level, closed periods, exchange rates, the language, the update preference and the record of your acceptance of the Terms of Use;

c. **Receipt photos** (the photos you choose to attach) and **backups**;

d. **Google connection** (if you turned sync on): the access key issued by Google and the e-mail address of the connected account (only to show it in Settings).

2.2. **In the Windows program** the records, settings, photos, the 90 most recent daily backups, PDF reports and Excel spreadsheets are kept in the "Documents\Kasa Jurnali" folder; the Google access key, encrypted for your Windows user account (Windows Data Protection, DPAPI), and technical working files are kept in "%LOCALAPPDATA%\Kasa Jurnali". The technical files are a log file with the times the program was started and closed, the path of the record folder (which may include your Windows user name), error messages and the result of the update check; the browser profile of the program window; downloaded update files; and temporary files. The log file does not contain the contents of your cash records.

2.3. **In the iPhone app** the records, settings, photos, the 30 most recent daily backups and the Google access key are kept in the app's own storage on the phone (the website data the browser sets aside for this web address). The app's own files are also kept on the phone so that it works offline.

3. When does the Software connect to the internet?

3.1. **Never:** the Software does not send records or personal data to any server of the Developer; it contains no usage statistics (telemetry), advertising, tracking cookies, analytics or automatic error reporting; and it does

not ask you for an account with the Developer, an e-mail address, a telephone number or identity details.

3.2. **Google Drive sync (optional):** when you turn sync on in Settings, you sign in with your Google account on Google's own page (google.com/device) and give the Software permission; your password is not entered into the Software. The Software asks only for the "drive.appdata" permission: with it, the Software can see only a hidden app folder set aside for Kasa Jurnali in your Google Drive; it cannot see, change or delete your other files in Drive. While sync is on, your records, your settings (except the language, the update preference and the acceptance of the Terms of Use), the list of deleted records and your receipt photos are sent to this folder and passed from there to your other devices connected to the same account. This transfer takes place directly between your device and Google over an encrypted connection (HTTPS); it does not pass through the Developer's servers.

3.3. The data in Google Drive is stored by Google LLC under Google's Terms of Service and Privacy Policy, on Google's servers, which may also be located outside Türkiye. Google provides this service to you through your Google account. The Software's use of information received from Google APIs adheres to the Google API Services User Data Policy, including the Limited Use requirements: this information is used only for the synchronisation function and only on your devices; it is not transferred to the Developer or anyone else, is not sold and is not used for advertising.

3.4. **Update check (Windows):** while the "Check for new versions automatically" option in Settings is on, the program downloads a small version information file from the Developer's website published on GitHub Pages (kasajurnali.github.io), when it starts and twice a day while it stays open. As with every internet request, your IP address, the program version and the type of operating system are passed to the server; your records are not sent. A new version is downloaded from the same site only when you press the "Update" button. You can turn this option off at any time.

3.5. **Loading and updating the iPhone app:** the files of the iPhone app are downloaded from the same website when it is first installed and when it checks for a new version. Your IP address and browser information are passed to the server then as well.

3.6. This website is hosted on the GitHub Pages service operated by GitHub, Inc. (a Microsoft company). GitHub may record IP addresses and request information for security and to operate the service under its own privacy statement; the Developer does not access these records and does not track visitors.

3.7. **Local connection (Windows):** to show its window, the Windows program uses only a local connection on your computer's own internal address (127.0.0.1), protected by an access key generated at random each time it starts. This connection is not open to other devices on the network. The program window is opened with the Google Chrome or Microsoft Edge installed on your computer, using a separate profile; automatic page translation and browser sync are switched off in this window. Any communication the browser itself may carry out for its own updates and services is governed by the browser maker's terms and your browser settings.

3.8. If you synchronise your Documents folder with OneDrive or a similar service, or share your reports by e-mail, messaging apps or the iPhone Share menu, the information concerned is transferred by your own choice and under the terms of that service. Such transfers are outside the Developer's knowledge and control.

4. Your role regarding personal data

4.1. You may enter personal data of other people into the Software, for example the name of a tradesperson or a crew member, the name of the person who approves reports, or a name, signature, vehicle plate or the last digits of a card number visible on a receipt photo.

4.2. If you use the Software only for activities concerning yourself or family members living in the same household, this use may fall outside the scope of the KVKK under its Article 28(1)(a). If you use the Software on behalf of a business, a vessel, a yacht owner or an employer, you or the person or organisation you work for is the data controller of that data. The obligations to inform (Art. 10), the conditions for processing (Arts. 5 and 6), data security (Art. 12), retention and destruction, and the rights of data subjects (Art. 11) then rest with you or that organisation.

4.3. In that case, turning on Google Drive sync means that the personal data in the records is transferred to Google's servers, which may also be located outside Türkiye. Ensuring that this transfer complies with Article 9 of the KVKK and other applicable legislation (for example, assessing whether appropriate safeguards exist) rests with you or that organisation as data controller; if these conditions cannot be met, do not use sync for such data.

4.4. The same allocation of roles applies where the EU General Data Protection Regulation (GDPR) or the data protection law of another country applies.

4.5. We recommend entering only the information that is necessary, and covering or cropping unnecessary details such as card or identity numbers on receipt photos.

5. Security

5.1. The Software has no password of its own; anyone who can access your Windows account or your unlocked phone can see your records. If sync is on, anyone who can access your Google account can also reach the copy in Drive.

5.2. We recommend a strong password for your Windows account, a screen lock on your phone (passcode, Face ID or Touch ID), 2-Step Verification for your Google account, keeping your operating systems and virus protection up to date, turning on disk encryption (e.g. BitLocker) where possible, taking care on shared devices and keeping your backups in a safe place.

5.3. All communication with Google and with the update website uses an encrypted connection (HTTPS). The Windows program does not install a downloaded update file without comparing it with the fingerprint in the version information file.

6. Retention and deletion

6.1. Your records stay on your devices and, if sync is on, in your Google Drive until you delete them. The 90 most recent automatic daily backups are kept in the Windows program and the 30 most recent in the iPhone app; older ones are deleted automatically; backups you make yourself are not deleted. The identifiers of deleted records are kept for 400 days so that they can also be deleted on the other devices.

6.2. Uninstalling the Windows program does not delete your records, but it does delete the Google access key. To delete all information from the computer permanently, delete the "Documents\Kasa Jurnali" and "%LOCALAPPDATA%\Kasa Jurnali" folders and any external backups after uninstalling.

6.3. When you delete the iPhone app from the Home Screen or clear Safari's website data, the records on the phone are deleted too.

6.4. To delete the copy in Google Drive: drive.google.com › Settings › Manage apps › Kasa Jurnali › Options › Delete hidden app data. To remove the Software's access to your Google account completely, use the "Disconnect" button in the Software or remove Kasa Jurnali's access in the "Third-party apps & services" section of your Google account.

6.5. Before deleting, take your legal record-keeping obligations into account.

7. Requests from data subjects

As the Developer does not access the data entered into the Software or the copies synchronised to Google Drive, it cannot handle requests under Article 11 of the KVKK concerning that data. Such requests should be addressed to the User who keeps the records, or to the organisation on whose behalf they are kept.

8. Children's privacy

The Software is not designed for people under 18.

9. Paid versions

If the Software is offered for a fee in future, a separate notice on the processing of the personal data needed for purchases, payments, invoicing and subscriptions (e.g. name, e-mail address, invoice details) will be provided before these transactions begin. While this notice is in force, the Developer collects no such data.

10. Changes

This notice may be updated with new versions. The current text can always be viewed under “Settings & backup › About & legal” in the Software and at the Software’s web address; important changes are shown to you the first time a new version is started.

11. Contact

You can send questions to the Developer through the channel from which you obtained the Software.

Kasa Jurnali — Third-Party Notices

(INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE
OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
```

2. Browsers and operating systems

Google Chrome, Microsoft Edge, Safari, Windows and iOS are not distributed with Kasa Jurnali. The Software uses this software, already installed on your device, under its own licence terms.

3. Google services

Google Drive sync uses Google’s OAuth 2.0 and Google Drive API services. Their use is subject to the Google Terms of Service, the Google APIs Terms of Service and the Google API Services User Data Policy. The Software contains no Google library; it communicates directly with Google’s public interfaces.

4. Hosting

The Software’s website, the iPhone app and the update files are hosted on the GitHub Pages service of GitHub, Inc.

5. Fonts

The Software uses the fonts installed on your device and does not distribute any font files.

6. Signal flags

The K, A, S and A flag drawings in the program were drawn by the Developer from the publicly available flag designs of the International Code of Signals.

7. Trademarks

Windows, Microsoft Edge, Excel, OneDrive and BitLocker are trademarks of Microsoft Corporation; Google, Google Chrome and Google Drive are trademarks of Google LLC; Apple, iPhone, iOS, Safari, Face ID and Touch ID are trademarks of Apple Inc.; GitHub is a trademark of GitHub, Inc. These names are mentioned only to describe compatibility and the software and services used together with Kasa Jurnali. Kasa Jurnali is independent software; it is not affiliated with, sponsored or endorsed by these companies. Other business names appearing in the program and its documents are used only as examples or for identification.
