Yachting Jurnal

User Guide

A daily expense and cash book for a boat, a business or a household. Works on a Windows computer and on iPhone, also without internet. If you like, keep the same book on both devices with Google Drive.

1 Installation
2 First start, language and settings
3 Home page, top strip and menu

6 Month end: new period
7 PDF and Excel reports
8 Saving and backups
9 Moving to another computer
10 Google Drive sync
11 The iPhone app
12 Questions and troubleshooting

Saves and syncs automatically

Every receipt is saved the moment you enter it; with Google Drive, the same book on your iPhone and computer.

Professional reports

An A4 PDF cash report with signature boxes and an Excel spreadsheet with formulas, in one click.

Made for yachts

Balance brought forward, negative cash, foreign currency, fuel litres, receipt photos. English and Turkish.

Windows 10 / 11 · 64-bit · iPhone: iOS 16 or later

Works with Google Chrome or Microsoft Edge (Edge comes with every Windows)

1 Installation

The installer is a single file: **KasaJurnali-Kurulum.exe**. You can download it from the Yachting Jurnal website (**yachtingjurnal.com**) or run it from a USB stick. No administrator password is needed.

1. Double-click **KasaJurnali-Kurulum.exe**.
2. Windows may show a blue warning, "**Windows protected your PC**". This appears because the program is new and not signed. Click **More info**, then **Run anyway**.
3. Answer **Yes** to "Yachting Jurnal will be installed on your computer".
4. After a few seconds "Installation complete" appears. Answer **Yes** to open the program straight away.

After installation there is a **Yachting Jurnal** shortcut with a compass icon on the desktop. The Start menu also contains the program, this guide and the terms of use.

> **How do I open the program?**
> Double-click the Yachting Jurnal icon on the desktop. The program opens in its own window; it does not look like a browser and has no address bar. When you close the window, the program closes too.

Updating

When a new version is published, the program shows a **New version** notice at the top. Just click **Update**: the new version is downloaded, checked, and the program reopens with it within a few seconds; your records are not touched. For this the program checks only a small version file twice a day; you can turn the check off under **Settings** › **About & legal**.

Uninstalling

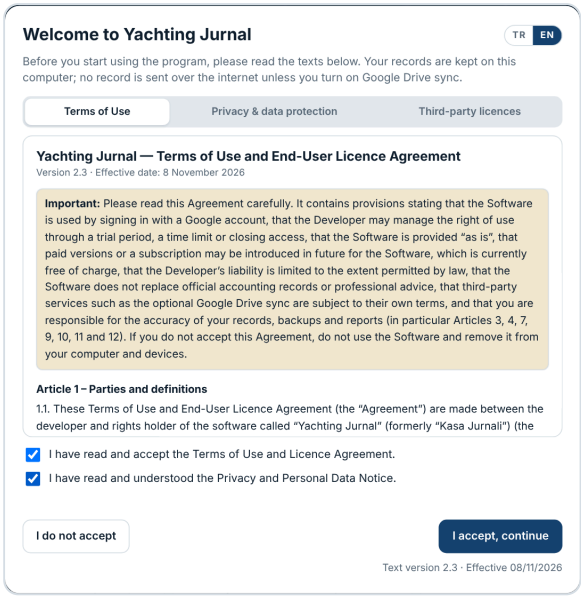

In Windows **Settings › Apps › Installed apps**, find **Yachting Jurnal** and click **Uninstall**. Your records are not deleted; they stay in the Documents folder.

2 First start, language and settings

When the program starts for the first time it shows the **Terms of Use** and the **Privacy** notice. Read the texts, tick both boxes and click **I accept, continue**:

- **I have read and accept the Terms of Use**: the program is provided “as is” (currently free of charge), does not replace official accounting records, and your records are your responsibility.
- **I have read and understood the Privacy Notice**: where your records are kept and where they go if you turn on Google Drive sync. Not a consent; it only confirms that you have read it.

If you do not accept, the program closes. You can read the texts again at any time under **Settings** › **About & legal**, or from the PDF in the Start menu.

First start: terms of use and language

English / Türkçe
Use the **TR | EN** switch at the top right (or **Settings** › **Language**) to show the screen, the PDF report and the Excel spreadsheet in English or Turkish. Your records do not change; categories and numbers are shown in the chosen language (₺15,000.50 / 15.000,50 ₺).

Book settings

On the **Boat Details** page in the menu, fill in the following and click **Save settings**:

FIELD	WHAT TO ENTER
Book name	The name of the boat, business or household. It appears at the top of the screen and on reports.
Prepared by / Approved by	The names of the captain and of the owner (or manager). They go into the signature boxes of the PDF report.
Opening cash and start date	The cash in the box on the day you start the book. This is the first month’s balance brought forward.
Low-cash warning	The program warns you when the cash falls below this amount (for example ₺10,000). Enter 0 to switch the warning off.

Importing your old Excel spreadsheet

In the same tab, drag your receipt spreadsheet (.xlsx) onto the **Import from Excel** box or click **Choose file**. The program finds the columns (Date, Company, Description, Expense, Cash in, Payment) by itself, offers the balance-brought-forward row as the opening cash and guesses categories from the company names. Check the preview and click **Add … entries**. If you load the same file twice by mistake, receipts already in the book are not added again.

3 Home page, top strip and menu

Home page: it greets the captain by name; at the very top, the date, the time and the rates

The program opens on the **Home** page. The captain's name comes from the "Captain" field in Boat Details, and the name on the yacht from the "Boat name"; if these are empty, Home shows a general welcome. From here, Open the journal takes you to your records, and Add receipt or Cash in let you enter one straight away.

Top strip: date, time and rates

- **UTC** and **LT** (this device's local time) are shown to the second, with the local time's difference from UTC.
- The scrolling line shows buying / selling and the day's change (▲ up, ▼ down) for the **US dollar, euro, pound, Swiss franc, gold (gram and quarter coin) and the gold ounce**. Free-market rates come from Trunçgil Finans and are refreshed every minute; if they cannot be reached, the daily rates of the Central Bank of the Republic of Türkiye (TCMB) are shown. Hover over the line to stop it.
- The rates are for information: on a receipt in foreign currency you enter the rate yourself; the program does not change it.

Menu

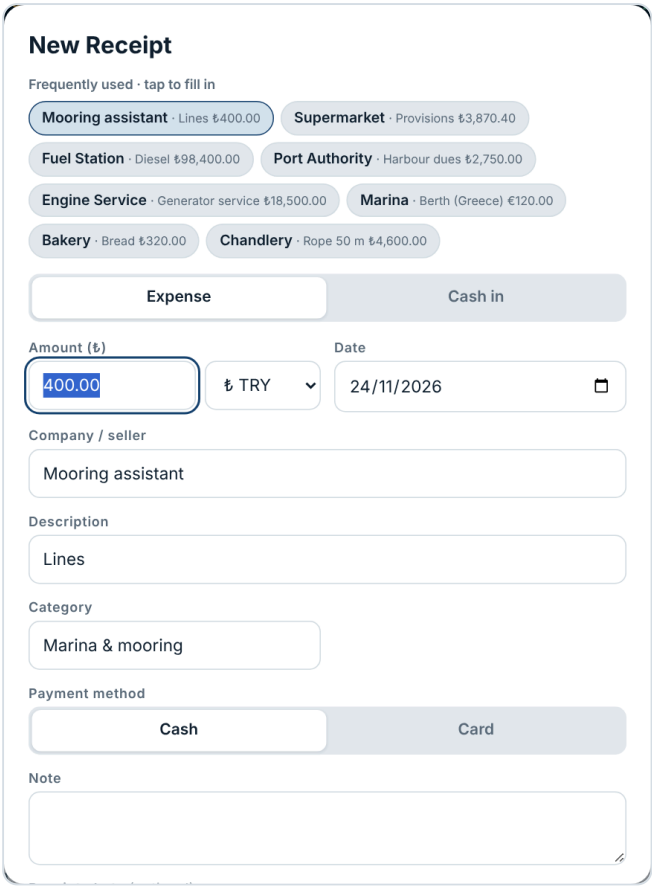

The ≡ button at the top left opens the menu: **Home, Journal, Receipts, Summary, Reports, Boat Details, Google Account and Sync, Import from Excel, Backups, Settings**, the user guide and the legal information. Each item opens its own page; the list of receipts is in the **Journal**.

4 Entering receipts and cash in

Click the **+ Add receipt** button at the bottom right (or press `N`). When money comes into the cash box, use **+ Cash in** (`I`).

1. Type the **amount**. Thousands separators are added for you (typing `15000` gives `15,000`); use a point for pence/kuruş: `1,250.50`
2. The **date** is today; change it if needed.
3. Enter the **company** and a **description**. The category is suggested from the company name.
4. **Payment method**: Cash or Card. The program remembers your last choice.
5. Click **Save** or press `Enter`.

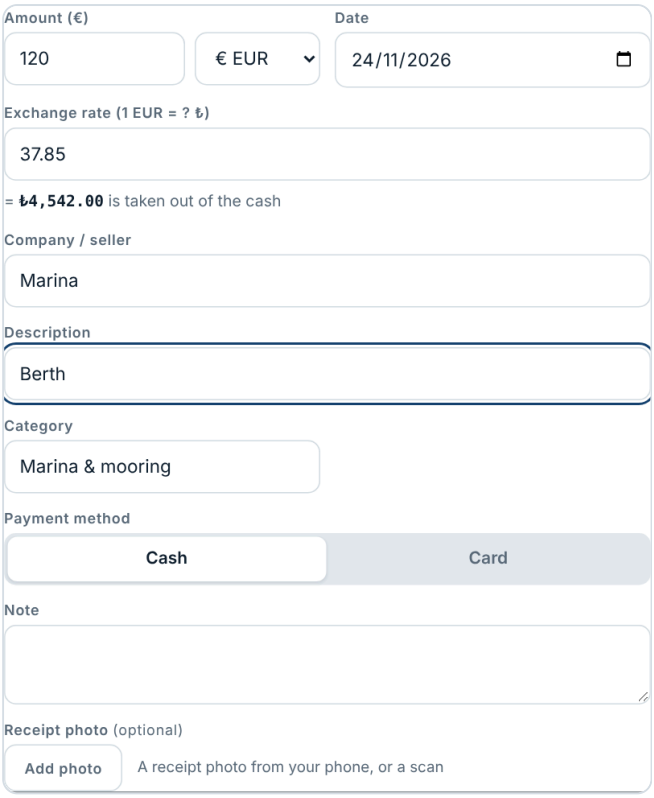

> **Frequently used**
> The top of the form shows receipts you have entered often in recent months (mooring, supermarket, fuel…). Tap one to fill in the details; just check the amount and save.

New receipt form with frequently used entries

Foreign currency (Euro, Dollar, Pound)

For spending abroad, change **₺ TRY** next to the amount to **€ EUR** (or $, £) and enter the **exchange rate**. The program converts the amount to Turkish lira and books it; the report shows a note such as "€120.00 × 37.85". The last rate you used is remembered.

A receipt entered in euros

Fuel litres

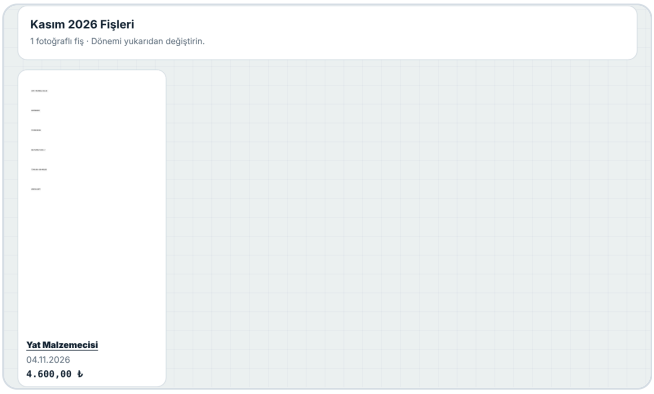

When the category is **Fuel**, a **Fuel (litres)** box appears. Enter the litres and the price per litre is worked out; the **Fuel log** in the Summary tab shows the total litres and the average ₺/L. If the description says "400 litres", the litres are picked up automatically.

Receipt photo

With Add photo you can attach a photo of the receipt (from your phone or a scan). Receipts with a photo show a **Receipt** tag in the list, and, if you choose, the photos are added at the end of the PDF report as annexes (the Excel spreadsheet has no photos).

The Receipts page in the menu shows the receipts with photos of the month chosen at the top; change the month to see that month's receipts. Click a photo to enlarge it, or the receipt's name to open the entry.

With Google Drive sync on, the photos are also kept in Drive in the **Kasa Jurnali › Receipts** folder, by month (e.g. "2026-11 November 2026") and with readable names ("2026-11-24 Mooring 400.00 ₺.jpg").

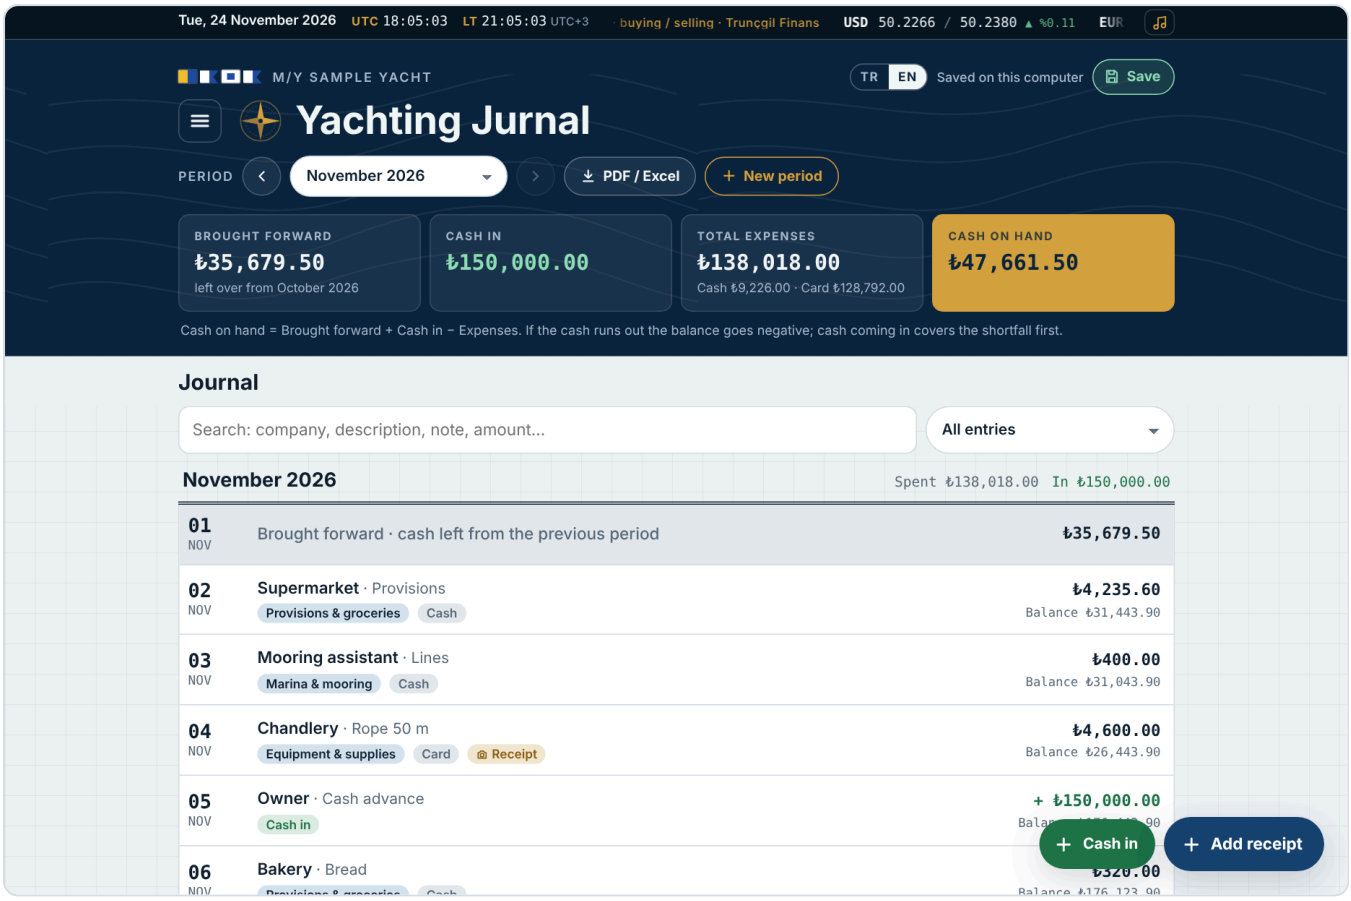

Receipts page: the receipt photos of the chosen month

Correcting, deleting, copying

Click a receipt in the list, change it and click **Save**. Clicking **Delete** twice deletes the receipt. **Copy to today** opens the same receipt again with today’s date.

5 How the cash balance works

Main screen: four cash boxes, warnings and the running balance after each receipt

The four boxes at the top summarise the selected month: **Cash on hand = Brought forward + Cash in − Total expenses**. Each month's balance brought forward is the previous month's cash on hand; you do not need to do anything by hand.

- Under each receipt in the list you see the cash left after it (**Balance …**).
- **If the cash runs out**, spending takes the balance below zero: the box turns red and says "Cash shortfall". This is money spent out of pocket.
- When **cash in** is added, it covers this shortfall first; the rest goes into the cash box. The program tells you when it saves.
- A yellow warning appears when the cash falls below the **warning level**.

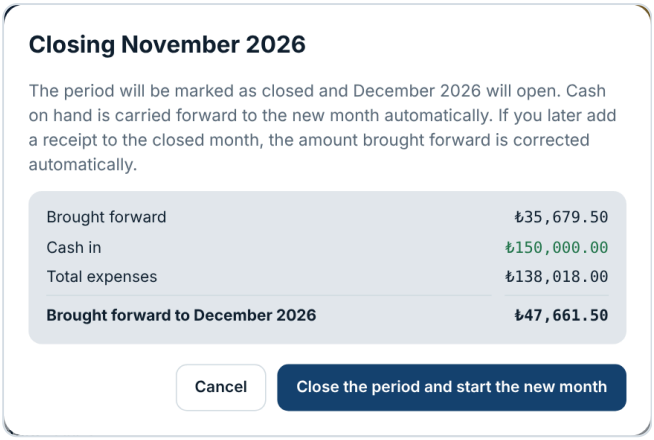

Use the search box to find a company, description, note or amount, and the filter to show only cash, card, foreign-currency or photo receipts. The **Summary** tab shows spending by category and payment method, the fuel log and a monthly spending chart.

6 Month end: new period

When the month is over, select it and click + New period at the top. A summary of the month and the amount to be carried forward are shown. When you click **Close the period and start the new month**:

- The month is marked "**Period closed**" (in the month selector and in reports).
- Cash on hand is carried forward to the new month automatically.

If you later add a receipt to a closed month, the balances brought forward are corrected automatically. If you closed a month by mistake, click **Reopen period** at the bottom of its list. Move between months with the ‹ › arrows.

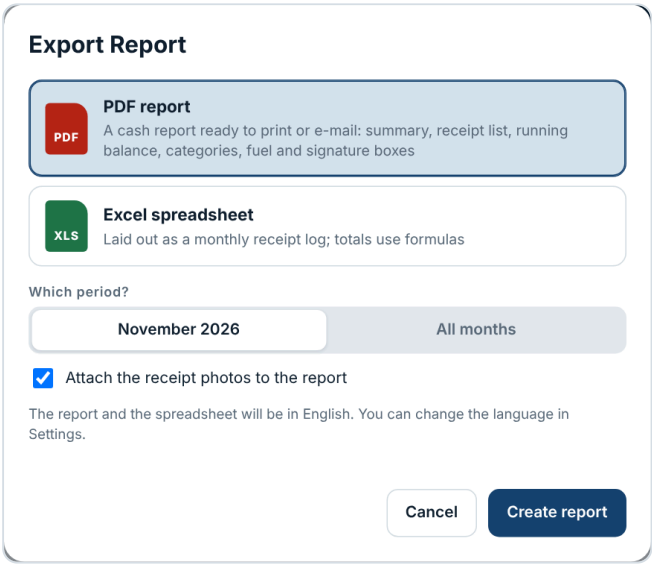

Closing a period

7 PDF and Excel reports

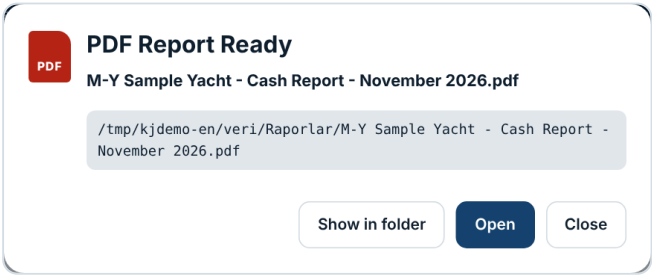

Click PDF / Excel at the top:

- **PDF report**: an A4 cash report with a letterhead and signature boxes. Cash summary, all receipts, running balance, categories, payment methods, fuel and currency summary; receipt photos as annexes if you wish.
- **Excel spreadsheet**: laid out as a monthly receipt log, with formulas for the totals. One sheet per month.

Choose the period (the selected month or all months) and click Create report. The file is ready in a few seconds; open it with **Open** or find it with **Show in folder**. Use this file to send the report by e-mail or WhatsApp. Reports and spreadsheets are made in the language you have chosen.

12/11/2026	Marina	Berth (Greece) €120.00 × 37.85	Marina & mooring	Card	4,542.00		73,181.90
14/11/2026	Supermarket	Provisions	Provisions & groceries	Cash	3,870.40		69,311.50
17/11/2026	Engine Service	Generator service	Maintenance & repairs	Card	18,500.00		50,811.50
20/11/2026	Port Authority	Harbour dues	Fees & paperwork	Card	2,750.00		48,061.50
24/11/2026	Mooring assistant	Lines	Marina & mooring	Cash	400.00		47,661.50
Total					**138,018.00**	**150,000.00**	
Cash on hand (Brought forward + Cash in − Expenses)							**47,661.50**

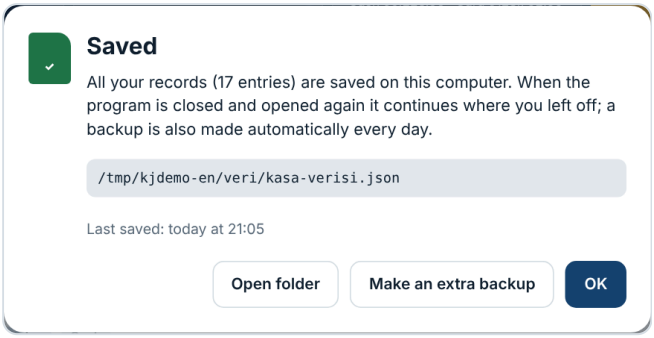

Prepared with Yachting Jurnal · For information only; not an official accounting record.

Page 1 of 3

8 Saving and backups

Every receipt is written to the computer's disk the moment you save it; "Saved · time" at the top shows this. When you reopen the program, everything carries on where you left off.

For peace of mind, click **Save** (or `Ctrl`+`S`): the program writes everything again and shows where the file is.

After clicking Save

Where are the files?

Everything is in `Documents\Kasa Jurnali` (**Backups** › **Open folder**); the folder names are Turkish:

FILE / FOLDER	WHAT IT CONTAINS
`kasa-verisi.json`	All your receipts and settings (the main record file). Do not delete or edit it by hand.
`Yedekler`	Backups: the automatic daily backups (last 90 days) and the backups you make yourself.
`Raporlar` · `Excel`	The PDF reports and Excel files you have created.
`Fotograflar`	The photos you have attached to receipts.

> **Keep the original receipts**
> Yachting Jurnal is a record-keeping aid, not an official accounting record. Keep the original receipts and invoices for the period required by law (e.g. Turkish Tax Procedure Law art. 253, Commercial Code art. 82).

Restoring from a backup

Backups › **Restore from backup**: choose a file in the Yedekler folder. The current state is saved as an extra backup first.

9 Moving to another computer

If Google Drive sync is on, there is nothing to move: install Yachting Jurnal on the new computer and connect the same Google account; the records and photos arrive by themselves. If sync is off, copy the `Documents\Kasa Jurnali` folder of the old computer to a USB stick, install Yachting Jurnal on the new computer and paste the folder into its **Documents** folder (answer "replace" if asked).

To recommend the program to a friend, share the Yachting Jurnal web address; everyone downloads the program there and keeps their own book.

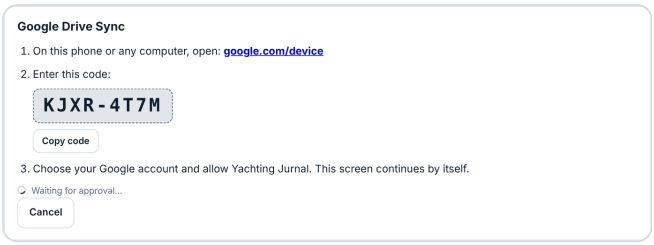

10 One book on phone and computer: Google Drive sync

If you use Yachting Jurnal on both a computer and an iPhone, you can sync the two devices through your own Google account. A receipt, correction, deletion, photo or setting entered on one device reaches the other within seconds. Sync is optional; without it each device keeps its own book.

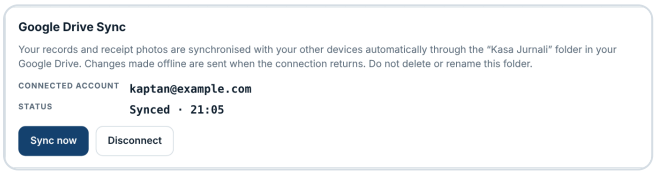

Connecting (once on each device)

1. **Google Account and Sync** › **Connect Google account**.
2. A code like **XXXX-XXXX** appears. On a phone or any computer, open **google.com/device** and enter the code.
3. Choose your Google account and allow **Yachting Jurnal**. The Yachting Jurnal screen continues by itself and runs the first sync.

Connect the same Google account on the second device too. If both devices already have records, they are merged; none is deleted. Your Google password is never entered into Yachting Jurnal.

The code to enter at google.com/device

Connected account and sync status

How it works

- The records are kept in your Google Drive, in a **hidden app folder** that only Yachting Jurnal can see. The program cannot see your other files in Drive.
- While the program is open it syncs a few seconds after each change and every two minutes. The cloud icon at the top shows the status: **Synced**, **Syncing...**, **Offline**.
- Without internet (at sea) just carry on; changes are sent when the connection returns.
- If the same receipt is changed on two devices, **the latest change** applies.
- The language and the acceptance of the Terms of Use stay separate on each device.

Disconnecting and deleting the copy in Drive

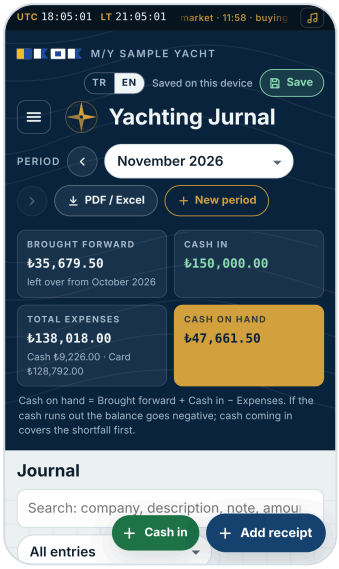

Disconnect stops sync on that device; the records on the device are not deleted. To delete the copy in Drive completely: **drive.google.com › Settings › Manage apps › Yachting Jurnal › Options › Delete hidden app data**.

11 The iPhone app

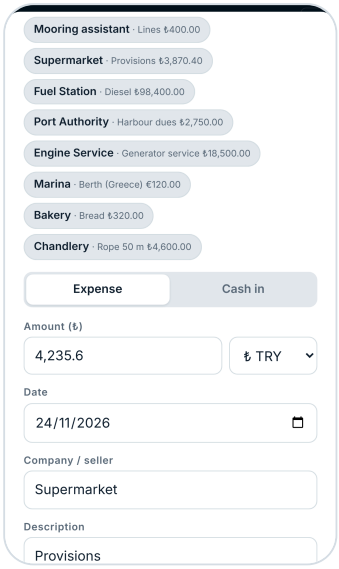

Yachting Jurnal runs on iPhone without the App Store. The app is added to the Home Screen from a web address opened in Safari; then it opens from its icon like any other app and also works without internet.

1. Open in Safari, add to Home Screen

2. Open it from the Home Screen icon

3. Enter receipts, add photos

Installing

1. On the iPhone, open **Safari** and go to **yachtingjurnal.com**.
2. Tap the **Share** button (the square with an arrow), choose **Add to Home Screen**, then tap **Add**.
3. Open it with the new **Yachting Jurnal** icon on the Home Screen and accept the Terms of Use.
4. To bring your computer's book to the phone, connect the same Google account on the Google Account and Sync page in the menu (section 10).

> **Important**
> Always enter records in the app you open from the Home Screen icon; a page opened in a Safari tab keeps its records separately. If you delete the app from the Home Screen, the records on the phone are deleted too: keep Google Drive sync on or save a backup file from time to time.

TASK	ON IPHONE
Receipt photo	**Add photo** takes a photo of the receipt or picks one from your photos.
PDF report	The report opens on screen. Use **Print / PDF** to print it, or Share in the print screen to save it as a PDF. **‹ Back** returns to the book.
Excel spreadsheet	**Share / Save** sends it by e-mail or WhatsApp, or "Save to Files".
Backup	A backup is taken on the phone every day (last 30 days). **Save a backup file** keeps a copy in Files.
Updates	The app downloads new versions by itself; the new version opens next time or when you tap **Update now**.

12 Questions and troubleshooting

SITUATION	WHAT TO DO
“Windows protected your PC” during installation	**More info › Run anyway**. The warning appears the first time because the program is not signed.
The antivirus blocked the installer	Add the file to your antivirus “allowed” list or restore it from quarantine.
The program window does not open	Restart the computer and try again. Microsoft Edge or Google Chrome must be installed.
“The program has closed in the background”	Close the window and open the program again from the desktop icon. Your records are not lost.
The PDF could not be created automatically	Click **Open the report in a window and print it**, then choose **Save as PDF** / **Microsoft Print to PDF** as the printer.
The Excel file will not open	Excel or LibreOffice is needed. Without Excel, use the PDF report.
“Not saved!” at the top	Click **Save again**. If the Documents folder is protected (Windows Security › Controlled folder access), allow Yachting Jurnal.
I deleted the wrong receipt	Use **Restore from backup** to load the previous day’s backup (receipts entered after that day must be entered again).
Using the program in Turkish	The **TR | EN** switch at the top right, or **Settings › Language**. Date boxes follow the new language the next time the program starts.
“Sync failed” at the top	Check the internet and press **Google Account and Sync › Sync now**. If it says access was removed, connect the Google account again.
The records do not show on the phone	Open the app from the Home Screen icon, not from a Safari tab, and connect the same Google account.
“New version” notice	Click **Update**; the program closes and reopens with the new version. Your records are not touched.
Reading the terms of use again	**Legal Information** in the menu, or **Settings › About & legal**. The PDF is in the Yachting Jurnal folder of the Start menu.

Keyboard shortcuts (computer): `N` new receipt · `I` / `G` cash in · `Ctrl` + `S` save · `Enter` save the form · `Esc` close the window

Privacy

Yachting Jurnal keeps your records on your own device; unless you turn on Google Drive sync, none of your records is sent over the internet. There is no advertising, tracking or usage statistics; it asks for no account, e-mail address or phone number. As the program has no password of its own, protect your Windows account with a password and your phone with a screen lock. Details: Privacy and Personal Data Notice.
